

Systems Engineer Vacancy

We are looking for a talented in-house developer to be involved in evolving our extensive Dynamics CRM system, as well as integration of bespoke 3rd party software/ C# plugins to fit our company's needs.

The role will include development and configuration work around MS Dynamics CRM, including C# plug-ins and SQL based reports. Tasks will include customizing various areas of the system and working along an agile process in order to deliver system developments within a monthly release cycle.

The successful candidate will be heavily involved in project work including integrations with the web and third-party software integrations mainly through C#/.NET. They will be involved in developing our Dynamics CRM API and how to get information into the system through feeds as well as sending out notifications to external companies and software.

Strong communication/ interpersonal skills are important as the candidate will be interacting with members of staff who will have varying levels of technical knowledge in order to identify process issues and requirements for new developments before designing and implementing. As well as this, the successful candidate should be organised, capable of working under pressure with excellent problem solving skills. There will be room for development within the role for continued learning to improve own skills and knowledge in a variety of different areas.

Desired Skills and Expertise

The following skills will be required by the candidate-

- Good working knowledge of database design and development, preferably with an understanding of SQL Server
- Working knowledge of C# and Webservices/ API's
- Strong analytical skills
- Good communication skills
- Excellent interpersonal skills
- Be able to maintain excellent performance while work is split across multiple projects

The following skills would also be strongly beneficial but not required-

- Experience in querying databases and use of indexes

- Working knowledge of JavaScript
- JSON, XML
- Strong financial background
- Experience of Microsoft Dynamics

Salary range: £28,000 - £40,000

If you know of anyone interested in applying for the role, or want to apply yourself, please contact Jonathan Bamford on 01275 813700

Introduction Scheme

The Company offers an incentive to any staff member for the introduction and successful recruitment of a new employee. The incentive will be payable in two equal amounts the first of which will be payable upon completion of their 3 months' probation and the second at the end of 6 months service. The total amount payable is dependent on the salary band of the new employee. The vacancy being advertised is band 6 and therefore the incentive could potentially be £1,750.

Salary Band	Referral
9	£2,500
8	£2,250
7	£2,000
6	£1,750
5	£1,500
4	£1,250
3	£1,000
2	£1,000
1	£1,000
